

DFG Riverways Program
with Bridgewater State College and SPREDD presents:

BEYOND SEWERING

Keeping Water Local

With keynote address by:

David DelPorto
Of Ecological Engineering

November 16th
@Bridgewater State College
Moakley Auditorium

Is your community facing serious decisions about water resource issues?

Finding the best solution for your community's current and future wastewater, drinking water and stormwater needs can be a daunting task.

BEYOND SEWERING will focus on:

- The value of integrated planning– wastewater, stormwater & water
- Assessing community wastewater/water needs
- Information on new and innovative technologies
- The economics of wastewater options
- The regulatory landscape
- Examples and successes from other communities

BEYOND SEWERING will kick off with a key note address by David DelPorto of Ecological Engineering, an innovator in the field of alternative wastewater treatment with decades of experience developing alternatives to sewerage. In addition to presentations there will be exhibitors with experience in holistic planning and innovative wastewater, stormwater and water supply solutions.

Check back on this site soon for more information and the final Conference Agenda. This all day Conference is free with lunch and refreshments provided, open to all but there is limited space so we urge you to sign up early. Call us if you have further questions 617/626-1540.

If you or your company are interested in having a display at the conference, please contact Riverways to obtain further information about this possibility, (617/626-1545 or cindy.delpapa@state.ma.us). Space is limited and Riverways will select qualified exhibitors by lottery. Exhibitors displays must focus on innovative alternatives and planning for water resources.
